MUBARAK SALAMI

Product Designer | End-to-end services, AI-enabled products and hands-on building

London, UK | salamilayor@gmail.com | +44 7881 188551 | Portfolio | LinkedIn

PROFILE

Product Designer with 9+ years' experience making complex, high-stakes services easier to understand and use. Designs the whole experience around what people need to know and do, across customer journeys, staff workflows, digital interfaces and service touchpoints. Experience includes regulated healthcare and financial products, where decisions must work within compliance, data and operational constraints. Combines research and systems thinking with clear interaction design and product writing, and builds working frontend products using React Native and agentic coding tools including Claude Code and Cursor. Has independently taken products from problem discovery through design, implementation and private beta or launch.

CORE STRENGTHS

- **End-to-end service design:** journey mapping, service touchpoints, triggers, user states, follow-up paths, defaults, edge cases and recovery
- **Complex and regulated workflows:** healthcare operations, financial services, KYC/AML, permissions, payments, patient access and compliance constraints
- **Clear product communication:** interface copy, product flows, onboarding, instructions, error and recovery states, research synthesis and stakeholder communication
- **AI product design:** LLM-powered experiences, prompt and instruction design, guardrails, clarifying questions, human next steps and model limitations
- **Build and ship:** React Native, HTML/CSS, Claude Code, Cursor, v0, Figma Make, Supabase, front-end iteration and engineering collaboration
- **Design systems and brand:** product foundations, components, tokens, visual direction, accessible patterns and consistency across surfaces
- **Research and iteration:** interviews, contextual observation, usability testing, behavioural analytics, rapid prototyping and evidence-led iteration
- **Tools:** Figma, FigJam, Figma Make, Claude Code, Cursor, v0, Google AI Studio, PostHog, Hotjar, Jira, React Native, HTML/CSS

EXPERIENCE

IndigoEMR | Senior Product Designer, Team Lead

April 2022 to Present

Lead product design for a cloud hospital management platform used across 20+ branches, supporting 200,000+ patient records and 300+ healthcare professionals. Lead and mentor three designers on selected products and independently own the patient app, business intelligence and internal administration platform.

- **Designed across the service, not just the screens:** mapped how patients, clinicians and administrators move through booking, arrival, triage, records, payment and follow-up, then shaped connected workflows across the patient app, clinic operations and internal tools.
- **Made complex information understandable.** Designed a business intelligence suite and self-service report builder for hospital leaders, translating reporting needs and underlying data constraints into clear journeys. Reduced management and board report preparation by 90%; simple reports generate in under two minutes.
- **Designed and shipped an LLM-powered symptom checker** using an existing model API. Defined prompts, instructions, interaction states and guardrails; it does not diagnose and directs patients to book with a consultant.
- Added natural-language report retrieval that asks a follow-up question when it cannot match a user's request, helping people clarify intent rather than leaving them at a dead end.
- **Designed for high-stakes operational constraints:** created role-based access and workflows for clinical, administrative and financial tasks, balancing user needs with data integrity, permissions and market-specific compliance requirements.
- Conducted hospital research, then commissioned and line-managed two external researchers through three months of on-site fieldwork. Wrote the brief and research questions, selected sites, reviewed findings, and combined observation, interviews and competitor research to shape platform architecture and onboarding.
- Redesigned historical record finding after interviews and support tickets revealed friction; reported lookup time fell by more than 70%. Designed a dedicated triage queue that reduced accepting and attending the next patient from three or four clicks to one.
- Designed and shipped a React Native patient app used by 20,000+ active patients, with access to results, bills, appointments, complaints and prescribed medication. Also designed a no-download scan-to-pay portal that reduced payment queues by up to 25% on busy clinic days.
- Built the design system from the ground up, setting typography, colour and spacing and leading 150+ components designed for WCAG 2.2 accessibility. Reduced design-to-engineering handover time by 30%.
- Facilitated workshops helping product managers use AI tools to express and test product hypotheses before roadmap commitment; partnered with engineering to create a separate environment for testing concepts with users.

FirstBank | Product Consultant, Product Design (contract)

February 2023 to March 2024 | concurrent contract

Design consultant reporting to the CTO, working with product, engineering, compliance, sales and banking stakeholders on customer and staff workflows.

- Designed a cross-channel account-opening SDK for web and mobile, allowing a customer to start on one channel and resume on another without repeating completed steps. Online accounts rose from under 1% to 7% of all account openings in the launch

financial year.

- Designed regulated customer journeys for diaspora banking, investigating a 70% identity-verification drop-off and addressing the experience gap with country-specific enrolment-centre information, save-and-resume and a guided path for applicants retrieving their ID number.
- Sole designer for FirstDirect2.0, a corporate banking app across iOS and Android, covering onboarding, payments, approvals, beneficiaries, subsidiary switching and liquidity workflows.
- Facilitated 10+ workshops, including an eight-lead requirements alignment and a 100+ stakeholder co-design session; presented design rationale to directors and managing directors.
- Partnered with engineering and compliance through QA and regulatory sign-off, making pragmatic decisions within banking and security requirements.

Sharply Africa | Founder and Lead Product Designer

February 2021 to 2024

Founded and led a logistics marketplace serving 100+ logistics organisations and fleets with 1,000+ riders. Owned product strategy, research, design and delivery across Business Admin, Rider, Partners and Customer products.

- Designed the end-to-end delivery service for organisations using their own fleets or third-party partners, including dispatch, rider fulfilment, partner bidding and customer updates.
- Designed an offline-first rider app around one-handed, in-motion use and a partner bidding portal accessible through a shareable link without an app install.
- Used PostHog and Hotjar to identify onboarding drop-off before first transaction; redesigned the flow around observed behaviour, contributing to increased repeat usage in the first quarter.
- Built and managed a multidisciplinary team of 7+ designers and developers, owning product decisions and delivery in a fast-moving startup environment.

Summitech Computing Ltd | Product Designer / Senior Product Designer

May 2017 to January 2021

Designed digital products across fintech, energy, property and entertainment in an agency setting, including regulated and operationally complex services.

- **Moniwave fintech:** led product direction and design across wallets, FX, payments, cards, KYC, transaction approvals, fraud review and back-office workflows; managed a five-person team and worked on KYC/AML frameworks and banking partnerships.
- **Enaro Energy:** led design for a customer app and operations tool monitoring grid production, source switching and power loss.
- **Filmhouse Cinemas and EbonyLife Place:** designed customer journeys across discovery, cinema booking, seat selection, food ordering, hotel and restaurant reservations.
- **Goby Homes:** owned an end-to-end redesign of a US property platform, including its design system, information architecture and buyer-to-agent communication flows.

SELECTED PRODUCTS BUILT WITH AI TOOLS

- **Rabii (2026):** independently designed and built a UK coach-ticket comparison app, including frontend, self-hosted data backend and custom route-management back office, using Claude Code and Cursor. MVP on TestFlight.
- **Mumbuddie (2026):** designed and built a pregnancy and postpartum companion app for underserved minority communities in the UK and Germany using React Native, Claude Code, Cursor, v0 and Google AI Studio. Shipped in private beta and gathering user feedback.
- **MyComparables (2026):** led design for a story-writing and reading platform, including reader and writer journeys, moderation tools and a voice-dictation feature for the writing flow.

EDUCATION

- **MSc User Experience Design**, University of Portsmouth, 2025
- **BSc Finance**, University of Lagos, 2021
- **AML and KYC Certification**, Coursera, 2020
