MUBARAK SALAMI

Product Designer | Consumer mobile, visual craft and discovery experiences

London, UK | salamilayor@gmail.com | +44 7881 188551 | Portfolio | LinkedIn

PROFILE

Product Designer with 9+ years' experience designing and shipping consumer and business products across iOS, Android and web. Combines strong visual design, layout and interaction craft with customer research, usability testing and data-informed iteration. Has independently designed native mobile products and end-to-end discovery, booking and payment journeys, alongside complex B2B platforms. Experienced in Figma prototyping, developer handoff, build QA, motion design and visual identity. Comfortable owning work autonomously while sharing ideas early, working closely with multidisciplinary teams and presenting design decisions to senior stakeholders.

CORE SKILLS

- **Mobile product design:** iOS, Android, React Native, mobile interaction patterns, onboarding, responsive experiences and usability
- **Visual craft:** UI and visual design, layout, typography, colour, graphic design principles, brand identity and polished production-ready interfaces
- **End-to-end design:** research, idea generation, journey mapping, wireframes, prototypes, usability testing, developer handoff, QA and iteration
- **Interaction and motion:** interaction design, micro-interactions, Lottie animation, loading and onboarding states
- **Evidence and outcomes:** user interviews, observation, usability testing, PostHog, Hotjar, analytics and measurable product improvements
- **Collaboration and leadership:** multidisciplinary teamwork, stakeholder communication, presenting rationale, critique, feedback and mentoring
- **Tools:** Figma, FigJam, Figma AI, Figma Make, Lottie, Framer, Miro, PostHog, Hotjar, Jira, React Native, HTML/CSS

EXPERIENCE

IndigoEMR | Senior Product Designer, Team Lead

April 2022 to Present

Lead product design for a cloud healthcare platform used across 20+ hospital branches. Lead and mentor three designers on selected products and independently own the patient app, business intelligence and internal administration platform.

- **Designed and shipped a native React Native patient app** used by 20,000+ active patients. Created mobile journeys for viewing results, paying bills, booking and managing appointments, reviewing complaints and seeing prescribed medication.
- Designed a scan-to-pay mobile web portal that lets patients settle bills from the waiting room without downloading an app. Payment queues fell by up to 25% on busy clinic days.
- Own design from idea generation and research through wireframes, interactive prototypes, polished UI, developer handoff, QA and iteration, working closely with product and engineering.
- Conducted interviews, field observation and usability tests to understand real customer behaviour. Tested three iterations of the historical-record experience; reported lookup time fell by more than 70%, and 90% of users who adopted the new view did not return to the old one.
- Use PostHog and Hotjar alongside direct research to identify friction, observe product behaviour and improve journeys. Designed a dedicated triage queue that reduced accepting and attending the next patient from three or four clicks to one.
- Led visual direction for a design system built from the ground up, establishing typography, colour and spacing and creating 150+ WCAG 2.2 accessible components. Reduced design-to-engineering handoff time by 30%.
- Created Lottie onboarding animations, loading states and micro-interactions across products, using motion to support feedback and make the experience feel responsive.
- Share work and rationale with stakeholders, facilitate workshops and incorporate feedback into clear next steps. Mentor designers through critique, delivery guidance and quality oversight.
- Designed dashboards and a self-service report builder for hospital administrators and leaders; the experience reduced management and board report preparation by 90%.

FirstBank | Product Consultant, Product Design (contract)

February 2023 to March 2024 | concurrent contract

Worked with product, engineering, compliance, sales and senior stakeholders on customer-facing digital banking products.

- **Sole designer for FirstDirect2.0**, a corporate banking app across iOS and Android. Redesigned onboarding and designed payments, approvals, beneficiary management, subsidiary switching, liquidity and invoicing, with tailored phone and tablet experiences.
- Designed a reusable account-opening journey across web and mobile, allowing customers to start on one channel and resume on another without repeating completed steps. Online accounts increased from under 1% to 7% of all account openings in the launch financial year.
- Facilitated 10+ workshops, including an eight-lead requirements alignment and a 100+ stakeholder co-design session; presented design decisions to directors and managing directors.
- Led visual direction for a shared design foundation across independently built products, aligning typography, colour, spacing, components, iconography and responsive behaviour.
- Partnered with engineers and compliance through QA and regulatory sign-off, ensuring implemented designs met product and security requirements.

Sharply Africa | Founder and Lead Product Designer

February 2021 to 2024

Founded and led a logistics marketplace serving 100+ logistics organisations and fleets with 1,000+ riders. Owned research, product strategy and design across Business Admin, Rider, Partners and Customer products.

- Designed an Android rider app for one-handed, in-motion use, with deliberate swipe interactions and clear colour-coded delivery statuses.
- Designed a customer experience, business admin platform and no-install partner bidding portal, bringing different sides of the delivery journey into one connected service.
- Used PostHog and Hotjar to find onboarding drop-off before first transaction and redesigned the journey around observed user behaviour, contributing to increased repeat usage in the first quarter.
- Set visual direction for a shared component library across products; refining it around live use cases reduced front-end rework by 30%.
- Built and managed a multidisciplinary team of 7+ designers and developers, sharing feedback and supporting design quality.

Summitech Computing Ltd | Product Designer / Senior Product Designer

May 2017 to January 2021

Designed consumer and enterprise digital products across entertainment, events, energy, property and fintech in a digital agency setting.

- **Filmhouse Cinemas:** designed parts of the rebuild for Nigeria's largest cinema chain, including movie discovery and detail pages, multi-location navigation, food ordering and back-office promotional content management. Work led to a follow-on engagement with EbonyLife Place.
- **EbonyLife Place:** owned design and visual direction for cinema discovery, booking, seat selection and food ordering, with separate hotel and restaurant booking experiences.
- **FlavorQueste:** designed the restaurant discovery and booking journey from search through reservation for a platform listing 500+ restaurants in Lagos and Abuja.
- **Goby Homes:** owned an end-to-end redesign of a US property platform, including its design system, visual identity, information architecture and buyer-to-agent journeys.
- **Enaro Energy:** led design for a customer energy app and an operations tool for monitoring grid production, source switching and power loss.

SELECTED INDEPENDENT PRODUCTS

- **Rabii (2026):** designed and built a UK coach-ticket comparison app, including a self-hosted data backend and route-management back office. MVP on TestFlight.
- **Mumbuddie (2026):** designed and built a pregnancy and postpartum companion app for underserved minority communities in the UK and Germany. Shipped in private beta.

EDUCATION

- **MSc User Experience Design**, University of Portsmouth, 2025
- **BSc Finance**, University of Lagos, 2021
- **AML and KYC Certification**, Coursera, 2020
