MUBARAK SALAMI

Senior Product Designer | Consumer experiences and complex operational tools

London, UK | salamilayor@gmail.com | +44 7881 188551 | Portfolio | LinkedIn

PROFILE

Senior Product Designer with 9+ years' experience designing customer-facing products and sophisticated operational tools across healthcare, fintech, logistics, marketplaces and entertainment. Skilled at simplifying complex systems through research, workflow mapping, information architecture and polished interaction and visual design. Owns design from discovery through prototyping, engineering handoff, QA and iteration, partnering closely with product managers, engineers and business stakeholders. Experienced in mobile and responsive design, design systems, e-commerce and service workflows, with a track record of measurable improvements to usability and operational efficiency.

CORE CAPABILITIES

- **End-to-end product design:** discovery, user interviews, workflow mapping, journey design, information architecture, wireframes, prototypes, UI and design QA
- **Consumer and enterprise experiences:** mobile apps, responsive web, marketplaces, customer journeys, staff workflows, administration tools and data-intensive platforms
- **Complex systems:** systems thinking, role-based workflows, permissions, operational processes, reporting and service design
- **Visual and interaction design:** polished UI, interaction patterns, layout, typography, prototyping and motion
- **Design systems:** Figma libraries, components, tokens, accessibility and consistent implementation across product areas
- **Research and validation:** qualitative and quantitative research, field observation, usability testing, behavioural analytics and iterative design
- **Collaboration and practice:** PM and engineering partnership, stakeholder communication, design critique, mentoring and raising UX quality
- **Tools:** Figma, FigJam, Miro, PostHog, Hotjar, Jira, Lottie, React Native, HTML/CSS

EXPERIENCE

IndigoEMR | Senior Product Designer, Team Lead

April 2022 to Present

Lead product design for a cloud hospital management platform used across 20+ branches, supporting 200,000+ patient records and 300+ healthcare professionals. Lead and mentor three designers on selected products and independently own the patient app, business intelligence and internal administration platform.

- **Lead design across customer-facing experiences and complex staff workflows**, from discovery and research through information architecture, interaction design, polished UI, engineering handoff, QA and iteration.
- **Designed and shipped a native React Native patient app** used by 20,000+ active patients. The app supports results, bills, appointments, complaints and prescribed medication.
- Designed a scan-to-pay portal for patients in clinic waiting rooms, connecting a customer-facing journey to billing and accounting workflows. Payment queues fell by up to 25% on busy clinic days.
- **Mapped complex workflows with users and staff.** Conducted interviews, field observation and usability testing across hospitals; commissioned and line-managed two external researchers for three months of fieldwork. Synthesised findings to inform platform architecture and onboarding.
- **Simplified operational journeys:** designed a triage queue that reduced accepting and attending the next patient from three or four clicks to one; redesigned historical record findability, reducing reported lookup time by more than 70%.
- **Designed a business intelligence suite** for administrators, department heads and hospital leaders across 20+ branches. Combined user discovery, usage analysis and data constraints to create dashboards and a self-service report builder that cut management and board report preparation by 90%.
- **Built and evolved a scalable design system** from the ground up, setting typography, colour and spacing and leading 150+ components designed for WCAG 2.2 accessibility. Reduced design-to-engineering handover time by 30%.
- Partner closely with product managers and engineers to define scope, communicate trade-offs, resolve implementation questions and review quality after build.
- Facilitate workshops and design critiques, share rationale with senior stakeholders and mentor designers through delivery guidance and quality oversight.

FirstBank | Product Consultant, Product Design (contract)

February 2023 to March 2024 | concurrent contract

Worked with product, engineering, compliance, sales and senior banking stakeholders on customer-facing and staff-facing digital banking experiences.

- **Sole designer for FirstDirect2.0**, a corporate banking app across iOS and Android. Designed six-step onboarding, single and bulk payments, beneficiary management, subsidiary switching, liquidity, invoicing and approvals; created distinct phone and tablet experiences.
- Designed a multi-channel account-opening journey that allowed customers to start on web, mobile or branch and resume on another channel without repeating completed steps. Online accounts grew from under 1% to 7% of all account openings in the launch financial year.
- Investigated a 70% identity-verification drop-off among overseas applicants and redesigned the journey around country-specific enrolment-centre information, save-and-resume and a guided route for applicants retrieving their ID number.

- Facilitated 10+ workshops, including an eight-lead requirements alignment and a 100+ stakeholder co-design session; presented design decisions to directors and managing directors.
- Led visual direction for a shared design foundation spanning components, typography, colour, spacing, iconography and responsive behaviour. Partnered with engineering and compliance through QA and regulatory sign-off.

Sharply Africa | Founder and Lead Product Designer

February 2021 to 2024

Founded and led a logistics marketplace serving 100+ logistics organisations and fleets with 1,000+ riders. Owned research, product strategy and design across four connected products: Business Admin, Rider, Partners and Customer.

- Designed consumer, partner and staff experiences across a marketplace, including an offline-first rider app, business operations tools and a no-install partner bidding portal.
- Mapped the end-to-end delivery service, from business dispatch through rider fulfilment to customer updates, and designed workflows for organisations using their own fleets or third-party delivery partners.
- Used PostHog and Hotjar to identify onboarding drop-off before first transaction; redesigned the experience around observed user behaviour, contributing to increased repeat usage in the first quarter.
- Set visual direction for a shared component library across separately developed products; refining it around live use cases reduced front-end rework by 30%.
- Built and managed a multidisciplinary team of 7+ designers and developers, supporting design quality and delivery across products.

Summitech Computing Ltd | Product Designer / Senior Product Designer

May 2017 to January 2021

Designed consumer and enterprise products across entertainment, e-commerce, property, energy and fintech in a digital agency setting.

- **Filmhouse Cinemas:** designed customer-facing movie discovery and detail pages, navigation across cinema locations, food ordering and back-office promotional content management for the rebuild of a cinema booking platform.
- **EbonyLife Place:** owned design and visual direction for cinema discovery, booking, seat selection and food ordering, plus hotel and restaurant booking experiences.
- **FlavorQueste:** designed restaurant discovery and booking from search through reservation for a marketplace listing 500+ restaurants in Lagos and Abuja.
- **Goby Homes:** owned the redesign of a US property platform, including its design system, information architecture, listing experience and buyer-to-agent communication workflows.
- **Enaro Energy:** led design for a customer app and an operations tool for monitoring grid production, source switching and power loss.
- **Moniwave:** shaped product direction and designed customer and operational workflows across wallets, FX, payments, cards, KYC and back-office tooling; managed a five-person team.

SELECTED INDEPENDENT PRODUCTS

- **Rabii (2026):** designed and built a UK coach-ticket comparison app, including a self-hosted data backend and custom route-management back office. MVP on TestFlight.
- **Mumbuddie (2026):** designed and built a pregnancy and postpartum companion app for underserved minority communities in the UK and Germany. Shipped in private beta.

EDUCATION

- **MSc User Experience Design**, University of Portsmouth, 2025
- **BSc Finance**, University of Lagos, 2021
- **AML and KYC Certification**, Coursera, 2020
